CONTENTS

MBS WANTLIST EDI PROCESS 19.3.11 HOTFIX 10300

MBS Wantlist EDI Process allows stores to electronically send wantlist requests to MBS.

5/21/17

1 PREREQUISITES

This update supports VisualRATEX versions as below:

Table 1 VisualRATEX Version Support

Version	Support	Details
19.3.11 and higher	Full	Implements all fixes and enhancements detailed below
19.3.10 and lower	None	Must upgrade to 19.3.11 for this release

2 FUNCTIONAL IMPACT

2.1 FUNCTIONAL CHANGES

- **Problem**: Adding items to existing purchase order not putting items in OUT and OOA fields in TX,SWF and CO.PODF
  Solution: Reworked quantities written to OUT and OOA fields

Figure 1 Purchase Order Fields

```
.(29).DIST.STORE.LINK...................... 3
.(30).DIST.STORE.QTY....................... 1
.(31).DIST.ORIGINAL.QTY.................... 2
.(32).DIST.LOCATION.LINK................... GEN5513
.(33).DIST.LOCATION.QTY.................... 2
```

- Field 30 was populating incorrectly with the reworked items. Fix was to add reworked items to fields 31 and 33.

```
TX.SWF.................................... 162.1.9781931859202
..(1).LAST.UPDATE........................ 04/20/17
..(2).REQ................................ 608
..(3).PROV............................... 700
..(4).EBB................................
..(5).ABB................................
..(6).SALES.............................. 358
..(7).NEW.ON.ORDER....................... 0
..(8).USED.ON.ORDER...................... 47 Should be "49", first retrieval
was "47" and second retrieval was "2" for a total of "49"
..(9).NEW.PENDING.ON.ORDER............... 0
```

5 VERSION NUMBER EXPLANATION

RATEX products follow this version numbering convention: *Major* version, *Interim* version, *Hot Fix* change, each separated by a period. For example, the third release of the first version is numbered like this:

19 (Major) . 3 (Interim) . 11 (Hot Fix)

What each number represents is illustrated in the table below.

Table 2 RATEX Version Numbers

Release Type	Major	Interim	Hot Fix
Frequency	12-18 Months	3 Months	As needed
Contents	Major new features	Feature Enhancements	Program fixes without feature change

Note: Security changes are made in Hot Fix releases, and all Major and Interim releases include these security updates.

Note: RATEX does not use wildcard versioning numbers. All version updates are inclusive of previous version updates, including previous security-impacting changes.
